

Systems.llb Readme

The Top-Level VI, Systems.vi, solves a system of linear equations, displays the graphs of the lines, and any solution. The linear equations are to be entered in standard form, $Ax + By = C$. If there is no solution, the solution indicator will become disabled and appear grayed out.

To open Systems.vi, double-click the LLB to open the LLB Manager. Then, simply double-click Systems.vi in the LLB Manager window.

This LLB and the contained VIs were built using LabVIEW 8.5 on a Mac running OS X. The LLB and VIs will run in Windows with LabVIEW 8.5 or later installed.
